Important information about excess removals

If your contributions exceed the annual IRS limit for Roth IRAs, the excess must be removed in order to avoid IRS excess contribution penalties. This form will document the excess, help you determine what amount to withdraw, and allow you to request the removal of the excess contribution. You may also request a withdrawal of an excess by phone.

Employee assistance: 1-833-811-7438 **Roth IRA owner information** (All fields required) Mail the form to: MarylandSaves PO Box 534486 Account number Pittsburgh, PA 15253- 4486 Overnight address: Social Security or taxpayer identification number MarylandSaves Attention: 534486 500 Ross Street, 154-0520 **IRA owner legal name** (First) (M.I.) Pittsburgh, PA 15262 Fax: **IRA owner legal name** (Last) (844) 756-9547 www.MarylandSaves.com **Telephone number** (In case we have a question about your account) **Excess contribution information** (choose one) **Contribution date** (Date of first contribution that resulted in the excess.) Contribution for tax year ___ __ __ Excess contribution reason (Select one) True excess (Roth IRA owner's contribution exceeded the annual limit or earned income, or Roth IRA owner exceeded modified adjusted gross income limits.) Deemed excess (Roth IRA owner was eligible to make the contribution but is removing the contribution as an excess before the deadline.)

3

Correction procedures

The correction procedure used depends on the timing of the removal. The deadline to remove an excess and avoid the excess contribution penalty tax is the Roth IRA owner's federal income tax filing deadline, including extensions (generally no later than October 15) of the year following the year for which the contribution was made.

Excess removed before deadline (Both true and deemed excess contributions may be removed as an excess before the deadline.)

Refer to pages 5 and 6 for information on how to calculate the net income attributable.

1.	Calculate the net income attributable (NIA) to the excess
2.	Remove the excess contribution amount and NIA (Total withdrawal amount from page 5)
	\$, ,
3.	This excess was removed before the deadline (select one)
	The excess was contributed and removed in the same year
	The excess was contributed in one year and removed in the following year
Ex	cess removed after deadline
On	ly true excess contributions may be removed as an excess after the deadline.

Remove only the excess contribution amount (Do not calculate or remove the net income attributable)

Withholding election (Form W-4P/OMB No. 1545-0074)

Federal withholding

(Federal income tax will not be withheld from this distribution unless you elect below to have federal tax withheld.*)

Note: If elected, tax will be withheld on the gross amount of the payment even though you may be receiving amounts that are excluded from gross income. This withholding procedure may result in excess withholding on the payment. If your distribution includes amounts that are includable in gross income and you do not have federal income tax withheld from your distribution, or if you do not have enough federal income tax withheld from your distribution, you may be responsible for estimated tax payments. You may incur penalties under the estimated tax rules if your withholding and estimated tax payments are not sufficient.

\bigcirc	I elect federal income tax withholding of	%	
	(Must be a whole percent, you may elect any rate from	0% to	100%.*)

See the attached Form W-4P Withholding Certificate for Nonperiodic Payments which has the Marginal Rate Tables and "Suggestion for determining withholding" instructions. You may use these tables and instructions to help you select the appropriate withholding rate.

*Generally, you can't elect less than 10% federal income tax withholding for payments to be delivered outside the United States and its possessions.

State withholding

(Your state of residence will determine your state income tax withholding requirements, if any. Those states with mandatory withholding may require state income tax to be withheld from payments if federal income taxes are withheld or may mandate a fixed amount regardless of your federal tax election. Voluntary states let individuals determine whether they want state taxes withheld. Some states have no income tax on retirement payments. Please consult with a tax advisor or your state's tax authority for additional information on your state requirements.)

Nan	ne of withhholding state
	I elect NOT TO have state income tax withheld from my retirement account distributions (only for residents of states that do not require mandatory state tax withholding)
	I elect TO have the following percentage withheld from my retirement account distribution for state income taxes
	(for residents of states that allow voluntary state tax withholding)
	Withhold %

Withholding Notice Information (Form W-4P/OMB No. 1545-0074)

Basic information about withholding from pensions and annuities. Generally, federal income tax withholding applies to the taxable part of payments made from IRAs.

Caution: There may be penalties for not paying enough tax during the year, through either withholding or estimated tax payments. New retirees should see Publication 505, *Tax Withholding and Estimated Tax*. It explains the estimated tax requirements and penalties in detail. You may be able to avoid quarterly estimated tax payments by having enough tax withheld from your IRA using form W-4P.

Purpose of form W-4P. Unless you elect otherwise, 10 percent federal income tax will be withheld from payments from individual retirement accounts (IRAs). You can use Form W-4P (or a substitute form, such as this form), provided by the custodian, to instruct your custodian to withhold no tax from your IRA payments or to withhold more than 10 percent.

Nonperiodic payments. Payments made from IRAs that are payable upon demand are treated as nonperiodic payments for federal income tax purposes. Generally, nonperiodic payments must have at least 10 percent income tax withheld.

Your election will remain in effect for any subsequent withdrawal unless you change or revoke it.

Payments delivered outside of the U.S. A U.S. citizen or resident alien may not waive withholding on any withdrawal delivered outside of the U.S. or its possessions. Withdrawals by a nonresident alien generally are subject to a tax withholding rate of 30 percent. A reduced withholding rate may apply if there is a tax treaty between the nonresident alien's country of residence and the United States and if the nonresident alien submits Form W-8BEN, *Certificate of Foreign Status of Beneficial Owner for United States Tax Withholding*, or satisfies the documentation requirements as provided under federal regulations. The Form W-8BEN must contain the foreign person's taxpayer identification number.

For more information, Publication 515, Withholding of Tax on Nonresident Aliens and Foreign Entities, and Publication 519, U.S. Tax Guide for Aliens, are available on the IRS website at www.irs.gov or by calling 1-800-TAX-FORM.

Revoking the exemption from withholding. If you want to revoke your previously filed exemption from withholding, file another Form W-4P with the custodian and check the appropriate box on that form.

Statement of income tax withheld from your IRA. By January 31 of next year, the IRA custodian will provide a statement to you and to the IRS showing the total amount of your IRA distributions and the total federal income tax withheld during the year. Copies of Form W-4P will not be sent to the IRS by the custodian.

Determining Net Income Attributable

When removing an excess contribution before the deadline, the net income attributable to the excess contribution must also be removed. To determine this amount, fill out the form below, using the example on the next page for reference, or contact MyCTSavings at the number specified on page 1 of this form.

Net income Attributable =	Contribution x Total Earnings	
Net income Attributable =	Adjusted Opening Balance	
Contribution		
The amount of the excess co	ntribution to be removed	\$,
Total Earnings		
_		_
The total earnings on the Rot	th IRA are determined in the following manne	r.
1. Determine the Roth IF	RA balance as of the date of withdrawal	\$,
·	y withdrawals taken after the excess e and before the excess removal	\$,
Subtract the balance of excess contribution was a subtract the balance of excess contribution was a subtract the balance of excess contribution was a subtract the balance of excess contribution.	of the Roth IRA immediately before the as made	\$,
	ontribution and all subsequent efore the excess removal	\$,

\$,	(Contribution)	
	(Total Earnings)	= \$
	(Adjusted Opening	

continued from page 7

Total Withdrawal Amount

The total amount to be removed equals the contribution amount to be removed plus the net income attributable. **Note:** *If* the net income attributable is negative, reduce the amount of the excess contribution by the net income attributable.

IRA Excess Contribution Example

- Kathy, age 40, is single. Her earned income is \$2,500. She made a \$5,500 Roth IRA contribution on May 12, 2022. She has now realized her mistake and wants to correct her excess of \$3,000.
- On August 11, 2022, Kathy is going to withdraw her \$3,000 excess contribution.
- Kathy will also need to remove the net income attributable since the excess is being corrected before the due date (the 2022 tax filing deadline, including extensions)
- · Her IRA activity appears below

Roth IRA	Balance
5/12/2022 beginning balance	\$41,758.21
5/12/2022 \$5,500 contribution	\$47,258.21
6/30/2022 dividend posting	\$47,337.75
8/11/2022 balance	\$47,437.72

Refer to the example below on how page 6 of the Excess Removal Worksheet would be completed.

Contribution

The amount of the excess contribution to be removed

\$3,000

Total Earnings

The total earnings on the Roth IRA are determined in the following manner.

	e total earnings on the Roth IRA are determined in the following manner.
\$47,437.72	1. Determine the Roth IRA balance as of the date of withdrawal
+ \$0	2. Add the amount of any withdrawals taken after the excess contribution was made and before the excess removal
- \$41,758.21	3. Subtract the balance of the Roth IRA immediately before the excess contribution was made
- \$5,500	Subtract the excess contribution and all subsequent contributions made before the excess removal
- \$0	5. Subtract any time deposit (or other investment) penalties that will be applied due to the excess removal

continued from page 8

Adjusted Opening Balance

The adjusted opening balance is the balance of the Roth IRA immediately before the excess contribution was made, plus the excess contribution and all subsequent contributions made before the excess removal.

\$41,758.21 + \$5,500 = \$47,258.21

Net Income Attributable

Total Withdrawal Amount

The total amount to be removed equals the contribution amount to be removed plus the net income attributable.

\$41,758.21 + \$5,500 = \$47,258.21

Note: If the net income attributable is negative, reduce the amount of the excess contribution by the net income attributable.

2023 Marginal Rate Tables

You may use these tables to help you select the appropriate withholding rate for this payment or distribution. Add your income from all sources and use the column that matches your filing status to find the corresponding rate of withholding. See below for more information on how to use this table.

Single or Married filing separately		Married filing jointly or Qualifying surviving spouse		Head of household		
otal income over—	Tax rate for every dollar more	Total income over—	Tax rate for every dollar more	Total income over—	Tax rate for every dollar more	
\$0	0%	\$0	0%	\$0	0%	
13,850	10%	27,700	10%	20,800	10%	
24,850	12%	49,700	12%	36,500	12%	
58,575	22%	117,150	22%	80,650	22%	
109,950	24%	218,450	24%	116,150	24%	
195,950	32%	391,900	32%	202,900	32%	
245,100	35%	490,200	35%	252,050	35%	
591,975*	37%	721,450	37%	598,900	37%	

^{*} If married filing separately, use \$360,725 instead for this 37% rate.

Suggestion for determining withholding. Consider using the Marginal Rate Tables above to help you select the appropriate withholding rate for this payment or distribution. The tables are most accurate if the appropriate amount of tax on all other sources of income, deductions, and credits has been paid through other withholding or estimated tax payments. If the appropriate amount of tax on those sources of income has not been paid through other withholding or estimated tax payments, you can pay that tax through withholding on this payment by entering a rate that is greater than the rate in the Marginal Rate Tables.

The marginal tax rate is the rate of tax on each additional dollar of income you receive above a particular amount of income. You can use the table for your filing status as a guide to find a rate of withholding for amounts above the total income level in the table.

To determine the appropriate rate of withholding from the table, do the following. Step 1: Find the rate that corresponds with your total income not including the payment. Step 2: Add your total income and the taxable amount of the payment and find the corresponding rate.

If these two rates are the same, enter that rate on line 2. (See Example 1 below.)

If the two rates differ, multiply (a) the amount in the lower rate bracket by the rate for that bracket, and (b) the amount in the higher rate bracket by the rate for that bracket. Add these two numbers; this is the expected tax for this payment. To get the rate to have withheld, divide this amount by the taxable amount of the payment. Round up to the next whole number and enter that rate on line 2. (See Example 2 below.)

If you prefer a simpler approach (but one that may lead to overwithholding), find the rate that corresponds to your total income including the payment and enter that rate on line 2.

Examples. Assume the following facts for Examples 1 and 2. Your filing status is single. You expect the taxable amount of your payment to be \$20,000. Appropriate amounts have been withheld for all other sources of income and any deductions or credits.

Example 1. You expect your total income to be \$60,000 without the payment. Step 1: Because your total income without the payment. \$60,000, is greater than \$58,575 but less than \$109,225, the corresponding rate is 22%. Step 2: Because your total income with the payment, \$80,000, is greater than \$58,575 but less than \$109,225, the corresponding rate is 22%. Because these two rates are the same, enter "22" on line 2.

Example 2. You expect your total income to be \$42,500 without the payment. Step 1: Because your total income without the payment, \$42,500, is greater than is greater than \$24,850 but less than \$58,575, the corresponding rate is 12%. Step 2: Because your total income with the payment, \$62,500, is greater than \$58,575 but less than \$109,225, the corresponding rate is 22%. The two rates differ. \$16,075 of the \$20,000 payment is in the lower bracket (\$58,575 less your total income of \$42,500 without the payment), and \$3,925 is in the higher bracket (\$20,000 less the \$16,075 that is in the lower bracket). Multiply \$16,075 by 12% to get \$1,929. Multiply \$3,925 by 22% to get \$863.50. The sum of these two amounts is \$2,792.50. This is the estimated tax on your payment. This amount corresponds to 14% of the \$20,000 payment (\$2,792.50 divided by \$20,000). Enter "14" on line 2.
